For this assignment, you need to create a UI for accepting card details. You need to copy and design the UI as close as possible to the one given below.

Note:

- The closer your project reflects the one given above the better. (Images and background colors etc. are not considered in evaluation, the structure should follow like the one given)
- Mimicking animations are tough so those are also exempted from evaluation.
- The UI is mobile responsive and you can use any CSS library to achieve the same.
- Use correct approach for the task (use ES6) and make your source code readable and organized.
